Who we are

MJ Engineering Projects is a Sydney based remedial works consultancy operating since 2007, delivering practical, high quality and cost effective solutions across the property sector.

We specialise in the successful delivery of remedial repair projects on behalf of strata and asset managers, developers, government organisations and owners corporations.

Trusted Remedial Engineering Professionals

We deliver projects across strata, commercial, industrial, government and heritage buildings.

PROJECTS

What we do

Remedial Engineering

We assess defects, design repair strategies, manage tenders and deliver durable, compliant solutions that protect assets.

Project Management

We manage remedial projects end to end, coordinating stakeholders, contractors and consultants from planning to handover.

Expert Witness Services

We deliver expert witness services with impartial technical opinions, site inspections, detailed reports and credible legal testimony.

Forensic Engineering

We analyse structural performance, investigate material issues, undertake laboratory testing and provide technical documentation.

Facade Engineering

We design, assess and upgrade facades, evaluating cladding, moisture control, fire compliance, thermal performance and structure.

Structural Engineering

We provide structural engineering, assessing loads, stability and foundations while designing safe, compliant refurbishments, upgrades.

Hydraulic Engineering

We provide hydraulic design, fluid modelling, network assessments, leak investigations, system upgrades, and sustainable, compliant water solutions.

Civil Engineering

We provide civil design services including roads, drainage, pavements, site development, utilities, earthworks and retaining systems.

OUR VALUES

*Let the **TIDE** carry your project forward*

1 TRANSPARENCY

We prioritise open communication, clear documentation, and honest reporting. Transparency builds trust with clients, ensures accountability across teams, and provides stakeholders with confidence that every decision is fair, justifiable, and evidence-based.

2 INNOVATION

We embrace forward-thinking methods, advanced technologies, and creative problem solving to deliver better project outcomes. Innovation allows us to stay ahead of industry challenges, streamline, and provide smarter, more effective engineering solutions.

3 DILIGENCE

We approach every project with thorough attention to detail and a commitment to accuracy. Diligence ensures risks are identified early, standards are consistently met, and outcomes are delivered to the highest professional quality.

4 ECONOMICAL

We design solutions that maximise long term value while minimising unnecessary costs. By balancing efficiency, durability, and compliance, we ensure projects remain economical without compromising on safety, quality, or performance.
